

## REMOTE VIDEO CONFERENCE

In the past, the only way to do business was to setup in person meetings with your accountant. This would require traveling to their office, which often meant you sit in traffic, look for parking, drive from one end of the city to the other, or a long road trip from a distant community worksite or home.

The good news is that technology is not only changing how we do business, but who we do business with and where. Krumm & Associates C.P.A.'s has developed a unique system that makes it convenient and easy to work with our professional staff. We provide the same level of service online that you would receive sitting in our office, and we utilize the most secure methods in transmitting your private information.

We offer an advanced technology platform so you always have convenient, real-time access to your financial documents and our staff. Via our Client Center, you can log in to your secure, personalized portal to view and print documents, enter data, access client accounting software, or work with us face to face from where you are using remote video conferencing.

There are many instances when it is necessary to work remotely.

- Weather
- Overseas, serving in the military.
- Disabilities
- Expediency

It's all about providing the best possible service for you.

# Clients
